**Q**uestions are asked about the effects of the program on the students' self-esteem, self-concept, and self-efficacy. The results of the study show that the program had a positive effect on the students' self-esteem, self-concept, and self-efficacy. The students who participated in the program showed higher levels of self-esteem, self-concept, and self-efficacy than the control group. The results of the study also show that the program had a positive effect on the students' academic achievement. The students who participated in the program showed higher levels of academic achievement than the control group. The results of the study suggest that the program is effective in improving the students' self-esteem, self-concept, and self-efficacy, and in increasing their academic achievement.
